

The Creator created the (female) Electric Universe and the (male) Ordered Magnetism.
The Ordered Magnetism, Demiurge, is the Muon-Tau caused by the Electric Universe setting part of herself in anti-parallel (with the assistance of the Creator) to complete the Trinity.
One of the most difficult things about being human is accepting the fact we are only human.
It is the realization of our own vulnerabilities, and the realization that the Forces of Nature are vastly more powerful than we are. That should not be surprising, as the Forces of Nature were fashioned by the Demiurge to create us. Either that is true, or we are simply bi-products.

Remember, living beings are minute, reticulated refringences of vastly greater entities.
Fingerprints and toeprints (nails are NOTs) may represent the secant (female) and cosecant (male) functions.
The whole body muscular flow of the limbs, trunk, torso and chest between the fingers, toes and the head, may represent the tangent (female) and cotangent (male) functions. The real-plane genitals, contoured by the pubic symphysis, chest by the armpits and the temples, may represent the sine (female) and cosine (male) functions.
The entire being, male or female, includes the body, fingers-toes, genitals and the head.
Life and Love function better without the desire to possess, which impedes function, Life and Love.

An instance where n binds itself ($n/n = 1$) is the identity form of recursion - self restraint-preservation.
An instance where n assists itself ($n * n, n^2$ or n^*2) is another form of recursion - selfishness-preservation.
An instance of inversion ($1/n$) may represent humility. An instance of rooting, $\sqrt[n]{n}$, may denote selflessness.
Resonant frequency is selfless, non-aggrandizing: Resonant frequency $f = 1/(2\pi\sqrt{\text{inductance} \times \text{capacitance}})$
Also, the pure (hyperbolic) identity functions are: creator = male / female, and creator = female - male.
(Legitimately, let the exponent, e^{+n} , equate to the spiritual, and the exponent, e^{-n} , equate to the material to get $\sinh: \frac{1}{2}(e^{+n} - e^{-n})$ equates to the female, and $\cosh: \frac{1}{2}(e^{+n} + e^{-n})$ equates to the male.)
And, yes, the perfect (trigonometric) identity function is: female + male = creator: $x^2 + y^2 = z^2$.

Please remember four things to make all this work:
Never think you know everything (from a Viet Nam Veteran).
Do not aggrandize yourself with what you do know.
Use what you know for the good of yourself as well as for others (take your own medicine).
Don't let your love turn to hate (or fear).
